Baht, resulting in a loss of 16.08 million Baht. With respect to income from Social Portal Media Platform, such income has not arisen.

After Blue Finix's success in August 2017, the official press conference was held and there were celebrities attended such press conference, e.g. Professor Kata Chinnabanchon, Seksan Sukpimai, Kon-bai-krai-kriad crew members and Miss Supranational. The Company has given support and helped with the coordination. Later, executives of Blue Finix saw the opportunity to be an alliance with Electronics Extreme Co., Ltd., an importer of online games, to jointly use resources to achieve the best business benefits, including the proposal of work expansion plan to the leading media business group in the Republic of Vietnam in October 2017.

Nevertheless, Blue Finix was not able to increase the number of customers to achieve the revenue targeted. The Company considered that such effect may result from the lack of strategic planning and marketing operational plan. Especially, there was a lack of budget allocation and prioritizing, which adversely affect the determination of budget allocation for each marketing tools. Moreover, the current economic circumstances have not positively encourage the operation as anticipated. Therefore, the Company proposed, in the Board of Directors' meeting of Blue Finix on November 7, 2017, that the executive board of Blue Finix should prepare clear quarterly action plan, budget plan, and expenditure plan and propose the drafts to the Board of Directors of the Company for consideration within November 14, 2017. However, the Company has not yet received such requested plan.

At present, Blue Finix has been facing financial liquidity problem. In the Annual General Meeting of the shareholders 1/2018 on April 25, 2018, the executives of Blue Finix has reported in the meeting regarding the loss performance. Therefore, the shareholders have directed the executives of Blue Finix to prepare business recovery plan. Then, the executives of Blue Finix has proposed such plan in the Board of Directors' meeting 3/2018 on May 4, 2018. However, the business recovery plan is still lack of feasibility and details. Therefore, the Company has requested the executives of Blue Finix to prepare the written business recovery plan in detail. At present, the Company has been waiting for the business recovery plan proposed by the executives of Blue Finix in order to consider business strategy accordingly.

2. Investment in the Philippines: The meeting of the Board of the Directors of the company held on January 26, 2017 has resolved to approve the purchase of the ordinary shares of Negros PH Solar Inc. ("NPSI"), in the Philippines, which is the solar power operator, from the existing shareholders of NPSI in the amount of 10,000 ordinary shares, representing 40 percent of the total issued shares of NPSI, which is the maximum shareholding percentage allowed under the laws of the Philippines. The shares acquisition transaction was subject to the approval from the meeting of the shareholders and upon certain conditions precedent under the share purchase agreement have been fulfilled. Currently, the status of the project is pending for the construction license approval process of the project, which delays due to change in policy on procedure and the license approval process of the licensing agency, which is the Department of Energy, Ministry of Energy, the Philippines. It is still in the process of reviewing additional documentation from the Ministry of Energy and we have not been able to conclude any progress.

Posting to the company's Board meeting which came to an agreement that NPSI is not able to complete the set criteria in the agreement, due to not being able to acquire the construction license which is a critical part that will take effect in many aspects of the project which resulted in an unsatisfied view by the company to further invest in this project. The company will proceed with recollection of the project deposit from NPSI board members in the amount of USD 600,000 or 21,234,000 THB which this amount, the shareholders of NPSI have forwarded to their (Escrow Agent). For the two investment items in the total amount of 34,102,184.62 Baht, the Company paid for such payment on the condition that the Company can demand for a return of the capital investment from NPSI's shareholders if NPSI may not operate the project and if the shareholders of NPSI refuse to return the security deposit, the Company is entitled to file a suit against NPSI's shareholders under the conditions stipulated under the agreement. The cancellation of the investment in NPSI resulted in the Company's entitlement in the full refund of the security deposit. Currently, the Company is under the negotiation for the counterparty to return the security deposit. In this connection, the counterparty agreed to enter into the agreement to return the security deposit which has the payment period for the total amount within August 15, 2018.

3. Investment in the Biogas Power Plant Project: DCORP has executed the Share Purchase Agreement with the existing shareholders of Aukkrarawat Plants Renewable Energies Co., Ltd. ("Aukkrarawat") in the amount of 25,000 shares, representing 50 percent of the total ordinary shares of Aukkrarawat. The transactions are divided in to 3 stages which currently, the company has yet entered into the third share purchase transactions, which specified in the share purchase agreement that the company will have to buy 8,181 shares from its existing shareholders representing 16.36 percent of the total ordinary shares of Aukkrarawat, the company has extended the completion of stage 3 investment by changing from within July 31, 2017 to complete within November 30, 2017.

Nevertheless, during the project area development, it was found that the neighboring communities around project materially retrieve less waste water from the project. Based on the inspection, it was found that (1) there are new power plant projects in the area and the neighboring community which could retrieve waste water from Aukkrarawat may consider retrieving the waste water from such new projects if it takes less transportation time for them, and (2) the neighboring community receives waste water from similar power plants located in the same area, some of which transport their waste water to the community. Therefore, it is not necessary for the community to retrieve the waste water directly from the project.

Due to such event, the Board of Directors has been informed about the change in the project. The Board of Directors, therefore, has assigned the management of the Company to conduct a study on impacts and possible solutions. Subsequently, the Board of Directors has received the result of the management's study on the chain of water receiving process of the community, and other possibilities for waste water treatment including the transportation of such water waste to the communities, installation of waste water treatment machines, and the increase of water settling area, and then found that these effect the costs of the project. From the study on the information of increased costs, the possible method which least effects the project costs is the transportation of the waste water out of the project, but such method would result in the material increase of costs by around 30 percent.

Nevertheless, the Company opines that operation of the project may result in an inability to acquire the benefits to the Company and for shareholders as when the investment was previously approved. Therefore, the Company has sought for investors who are interested in the project and it is currently under the negotiation.
